S.O.D MORE

Extraordinary antioxidants in **SOD Enzyme (Superoxide dismutase)** filled with potent phytonutrients selected from over 125 types of fruit and vegetable that have been processed for 180 days. SOD Enzyme helps boost immune system in the body, rejuvenate cells damaged from oxidative stress, so-called **Proactive Oxidant**.

Superoxide dismutase [SOD]

Although antioxidants to fight with free radicals can be naturally produced, the amount of it gradually reduces as we age. SOD helps our body decrease oxidative stress at **DNA level that causes various disease from aging**.

Phytonutrients

are rich of antioxidants from fruit and vegetable, making them truly promising and powerful source of SOD

Oxygen radical absorbance capacity [ORAC]

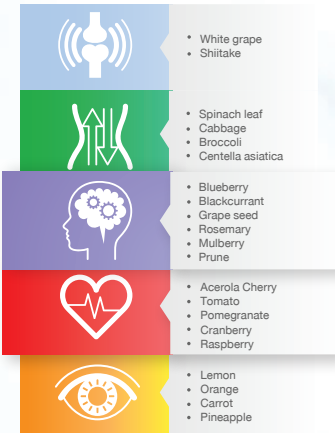

The higher ORAC, the greater quality of antioxidants to help improve body's defense mechanism.

ORAC : 312,000 μ mole Trolox equivalent

SOD Enzyme : 100,200,000 IU

*ORAC value tested by the Laboratory Tentamus. SOD and ORAC are measured with 600 ml of S.O.D MORE intake.

- Delay cell impairment process
- Slow down cell deterioration
- Improve overall body performance
- Improve fertility for both men and women
- Protect skin from sun damage
- Prevent skin aging marks for radiant look
- Prevent cancer cell growth
- Increase energy
- Help sleeping disorder

How to drink :

Drink 1 shot to constantly maintain overall health

Drink 2-3 shots to boost up the immune system (in the morning and before bedtime)

** 1 shot is equal to 15 ml.
Shake well before drinking, keep it cool after it is opened, and finish the bottle by 45 days.
